Profile

Frontend / Full-Stack Developer with experience building **web applications and SaaS features** using **React, Next.js, TypeScript, Python, and Django REST Framework**. I have worked on frontend and backend integrations, **REST API endpoints, responsive interfaces, and automation of administrative processes for real users**.

I have a **background in UX/UI**, which helps me **build functional, clear, and user-centered products**. I use **AI tools** as support for faster development, **debugging**, and refactoring while maintaining technical judgment, manual review, and good coding practices.

Technical Skills

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3, Responsive Design

State & UI: Redux, Context API, Reusable Components, UX/UI

Backend: Python, Django, Django REST Framework, REST APIs

Familiarity: Node.js, Express.js

Databases: PostgreSQL, MySQL, SQL

DevOps & Deployment: Docker, Vercel, Render, Railway, GitHub Actions

Dev Tools: Git, GitHub, Figma, Cursor, Claude Code, OpenCode

Methodologies: Agile/SCRUM, Code Review, Pair Programming, AI-assisted Development

Experience

Ticsa

Santiago, Chile
(Remote)

Full-Stack Developer

Feb 2024 – Jul 2024

- Developed **full-stack features** for an **operational and administrative SaaS platform** using **React, TypeScript, Python, Django REST Framework, and MySQL**.
- Implemented **modules and components** for **HR, invoices, and payroll processes**, used by approximately **100 users across 3 client organizations**.
- Created **REST API endpoints** for new **SaaS routes and features**, connecting **React/TypeScript** interfaces with backend services in **Django REST Framework**.
- Built **responsive and reusable interfaces**, focusing on usability, visual consistency, and clear organization of complex operational data.
- Developed **Python scripts to automate** monthly employee payroll generation and client invoices, reducing manual work in recurring administrative processes.
- Collaborated in **SCRUM sprints**, participating in planning, development, code review, and functional adjustments.

Dropsher

Madrid, Spain
(Remote)

Front-End Developer | UX/UI Designer — Professional Internship

Nov 2022 – Feb 2023

- Developed a **responsive landing page** using **React** and designs created in **Figma**.
- Translated **wireframes and visual prototypes** into reusable **frontend components** adaptable to different screen sizes.
- **Applied UX/UI criteria** to structure navigation, visual hierarchy, and product information.
- Collaborated in an **agile workflow**, connecting design decisions with frontend implementation.

Projects

Spendwise — Next.js, TypeScript, Django REST Framework, PostgreSQL

Live: <https://spendwise-psi-silk.vercel.app/> · GitHub: <https://github.com/Pdwxn/spendwise>

Full-stack personal finance application for tracking, organizing, and analyzing income, expenses, budgets, and savings.

- Implemented **email and Google authentication**, **JWT session** handling, and private user data management.
- Built the **responsive frontend** with **Next.js, React, and TypeScript**, including light/dark mode and **mobile-first navigation**.
- Developed the backend with **Django REST Framework and PostgreSQL** for categories, financial transactions, and user preferences.
- Deployed the **application to production**, connecting frontend, backend, and database services.

Cover Letter AI — React, TypeScript, Groq API, Llama 3.1 8B

Live: <https://cover-letter-ai-zeta.vercel.app/> · GitHub: <https://github.com/Pdwxn/Cover-letter-ai>

Application that generates personalized cover letters using artificial intelligence.

- Integrated the **Groq API with Llama 3.1 8B** to generate **personalized cover letters** based on **user information and job context**.
- **Designed a simple input/output flow** to produce fast, clear, and editable responses.
- Improved **output quality through prompt logic** and iterative adjustments.

Auth Transparency — React, TypeScript

Live: <https://auth-transparency.vercel.app/> · GitHub: <https://github.com/Pdwxn/auth-transparency>

Web application focused on visualizing and understanding authentication flows in real time.

- Developed an **interactive interface** to analyze **authentication processes and user state management**.
- Implemented frontend architecture with **React and TypeScript**, prioritizing clarity in data representation.
- Designed the project as an educational tool to better understand **modern authentication systems**.
